CAREER OBJECTIVE

Final-year Computer Science Engineering student with hands-on experience in full-stack web development. Proficient in Java, Python, JavaScript, SQL, React.js, Node.js, Express.js, and MongoDB. Eager to contribute technical skills, solve real-world problems, and grow in a collaborative professional environment. Strong foundation in data structures, problem-solving, and building scalable, user-focused web applications.

INTERNSHIP

MAIN FLOW SERVICES AND TECHNOLOGIES PVT. LTD.

Jan 2025 – Mar 2025

- Developed responsive web pages using HTML, CSS, JavaScript, and Bootstrap, ensuring cross-browser compatibility, mobile responsiveness, and an enhanced user experience.
- Built interactive UI components, debugged frontend issues, optimized website performance, and tested functionality by following web development best practices.

PROJECTS

JewelStore

Mar 2026 – Sep 2026

- Designed and developed a responsive MERN e-commerce platform using React.js, Express.js, Node.js, MongoDB, and Bootstrap following full-stack development best practices.
- Integrated category-based filtering, search functionality, and database integration to improve product discovery, application performance, and user experience.

Patient Tracker & Medicine Reminder System

Jul 2025 – Nov 2025

- Constructed a secure Healthcare Management System using MERN technologies, integrating Nodemailer for automated communication, which reduced manual follow-ups by an estimated 80 hours per month.
- Implemented role-based dashboards, appointment booking, prescription management, patient tracking, and automated email notifications for medicine reminders and appointment schedules.
